

We fit together

***Technical parts for
high requirements are
our speciality***

***For more than 40 years, we have
made a name for ourselves in
problem-orientated action and
thinking for and with our customers
in the processing of plastics.***

***The company employs about 30 people with
varying competences and strengths. All our
thinking and action is consistently orientated
to the customer and the specific needs.
That is why openness, trust and partnership
in practice characterise our co-operation,
internally and externally.***

***With full orientation to the demands of the
market and needs of our customers, we
develop and produce precision plastic parts,
either as finished or semi-finished products,
as well as complete assembly groups in both
the macro and micro sectors.***

***From the idea to the develop-
ment, from prototypes to series
production, Stefan Kälin AG
offers the entire spectrum of
service and supply: construc-
tion, moulds, design, material
optimisation, and the structu-
ring and production of plastic
components. We are leaders
in cost-optimised solutions,
performance and quality.***

***Contact us for a discussion of
your specific needs. We look
forward to a personal, solu-
tion-orientated and successful
co-operation with you.***
